## EDUCATION

### **BNM Institute of Technology**

Computer Science Engineering **CGPA – 9.51**

Banashankari, Bengaluru

Sep 2023 – Sep 2027

### **Alvas PU College**

Class – XII PUC **Percentage – 94.83%**

Moodbidri, Dakshina Kannada

April 2023

### **Nalanda High School**

Class – X **Percentage – 95.84%**

Tiptur, Tumkur

July 2021

## PROJECTS

- **Meal Planner Website (Full Stack):** Developed a responsive web app that generates calorie-based meal plans with vegetarian/non-vegetarian/Vegan options. Added regenerate plan, About Us, and Contact Us with feedback features.
- **Invoice Processor (Python, Pandas, Tkinter):** Built a desktop application to automate PDF invoice processing, generate Excel and PowerPoint reports, and visualize vendor-wise spending through an interactive GUI.
- **Micro Scan AI (AI/Data Science):** Built an AI-based microplastic detection system using YOLO, Flask, and OpenCV to identify and classify microplastic particles from water sample images. Integrated contamination risk assessment, automated reporting, and a user-friendly web interface for environmental monitoring.
- **Student Feedback Application (DevOps):** Developed a web-based feedback management system using Flask and MongoDB. Containerized the application with Docker and integrated SonarQube for code quality analysis. Applied DevOps practices using Git and GitHub for efficient development and deployment workflows.

## PRACTICAL LEARNING AND INTERNSHIP

### • **Web Development**

Organization: BNMIT, Banashankari, Bengaluru | Role: Intern | Duration: 3 week Internship - Gained hands-on experience in web development using HTML, CSS, JavaScript, and MongoDB. Built dynamic and responsive web applications while strengthening skills in full-stack development, database integration, and web solution implementation.

### • **Computer Vision with Python**

Organization: RoboManthan, BTM Layout, Bengaluru | Role: Intern | Duration: 2nd June 2025 – 27th June 2025 – Gained hands-on experience with OpenCV and computer vision techniques using Python. Developed mini-projects including color detection, object detection and identification.

### • **Data Analytics Job Simulation**

Organization: Deloitte Australia (Forage) | Role: Virtual Experience Participant | Duration: March 2026-April 2026 - Completed practical tasks in data analysis and forensic technology, gaining hands-on exposure to data-driven problem solving, insight generation, and analytical workflows used in consulting projects.

## TECHNICAL SKILL

- ✓ **Programming Languages:** JAVA, C (Basic).
- ✓ **Tools and Platforms:** GitHub, VS Code, Docker, Git.
- ✓ **Web Development:** HTML, CSS.
- ✓ **Database:** MySQL, MongoDB.
- ✓ **Concepts:** AI/ML(Basic), DBMS, OOPS.

## HACKATHONS

---

- **RIFT '26 Hackathon** – hackathon in association with **Physics Wallah Institute of Innovation**.  
Participated in a national-level 24-hour open innovation hackathon, working collaboratively to design and present an innovative solution for a real-world problem.
- **AI RENA 2.0** – National-level AI Hackathon organized by **REVA University**.  
Presented an AI-driven scar imaging solution for automated post-surgical healing assessment using computer vision and image analysis.

## CERTIFICATIONS AND ACHIEVEMENTS

---

**Introduction to IOT- NPTEL | Intro to MongoDB-Infosys Springboard| Scholarship for Academic Excellence**
